

Tuition Express Makes Sense for Your Business

- **Stable, Reliable Payment Method**
Tuition Express eliminates the headache of having to chase parents for payments. You establish payment schedules that are precisely defined and understood by parents.
- **Prompt NSF Notification**
Centers using Tuition Express receive Non-Sufficient Funds notification within 72 hours. With the average center losing 5-10% of its gross revenue to Bad Debt, the quicker you know about NSFs the better chance you have of collecting.
- **Removes the Opportunity for Theft**
By collecting tuition and fee payments electronically, you'll eliminate the possibility of an employee "pocketing cash", stealing or altering checks.
- **Avoid Parent Skips**
Parents sign a legally binding contract when enrolling in Tuition Express which clearly states they must give the center five days written notice prior to terminating the service. If the child withdraws from center without notification, tuition and fees are still due and collectable via Tuition Express.
- **Faster Settlements**
If you deposit a check at your bank today, it often takes up to five days before those funds are available to you. With Tuition Express, the funds are available within 48 hours of your transmission.
- **Reduced Processing Time**
Tuition Express is built right in to your ProCare Software. With a few clicks of the mouse, tuition payments can be processed and posted to the parent's ledger card automatically.
- **All It Takes Is An Update**
If your center already uses ProCare, a simple update is all you need to begin collecting childcare payments electronically.
